

IRWIN®

UTILITY KNIVES & BLADES

BI-METAL UTILITY BLADES

SHATTERPROOF

TRAPEZOID BLADES
FIT MOST KNIVES

LAST 3 TIMES
LONGER*

BI-METAL BLUE BLADES

Bi-Metal is formed by welding high-speed steel edge and spring steel, having the benefit of both types: Safety & Longer Life.

IRWIN® Bi-metal Blue Blades are safer since they will not break under normal working conditions, and they help reduce the risk of injury from breaking or shattering blades. And, with the blades lasting longer than traditional carbon blades, they result in fewer blade changes which means fewer accidental cuts.

SNAP-OFF BLADES
SOFT SNAP
TECHNOLOGY

1. SHATTERPROOF

Spring steel allows the blade to bend without accidentally breaking

2. LAST 3 TIMES LONGER*

High speed steel hardened cutting edge stays sharp 3X longer than traditional carbon blades which means more cuts for the money

3. TRAPEZOID BLADES FIT MOST KNIVES

Two-notch blade design fits most utility knives

4. SNAP-OFF BLADES SOFT SNAP TECHNOLOGY

For breaking a new edge confidently

3X LONGER LIFE*
*vs. traditional carbon blades

CARBON STEEL UTILITY BLADES

CARBON STEEL 4-POINT TRAPEZOID BLADES

This IRWIN® innovation combines the toughness of a traditional trapezoid blade with the increased blade tip life of a snap-off blade. Scored edges give the user 4 sharp points (vs. 2 points on a standard trapezoid blade) which doubles the life of the blade. The 4 notches enable the blade to be extended to maintain blade length after snapping off sections of the blade.

2X LONGER LIFE*
*vs. traditional carbon blades
