

WOODWORKING

In 1933, a young man by the name of Hans Schroder set up as a wholesaler in Copenhagen, Denmark. During the first few years he kept his focus on selling general hand tools, but in 1938 he started to also manufacture saws. Amongst his friends and business associates Hans Schroder was known simply as Jack, and before long, the "Jack" name had become synonymous with the production of high quality saws.

IRWIN® Jack® has been at the forefront of many advancements with the development of the market leading Jack® 880 now with upgraded ProTouch™ handle to compliment the recently upgraded universal triple ground tooth technology.

Marples®

At the heart of quality craftsmanship lies the rich heritage of Marples® woodworking tools. Originating in 1828 in Sheffield, England, the Marples® brand has consistently stood for superior performance and ultimate precision in fine woodworking.

Founder William Marples came from a long lineage of master craftsmen in the joinery and edge tool trades, and after serving as an apprentice to his father he established William Marples and Sons Limited. Using only the finest materials Marples® had his name stamped into every product as a sign of his confidence in the quality and craftsmanship of each tool.

A JACK FOR ALL TRADES

The IRWIN® Jack® PLUS range provides best-in-class handsaws for today's trade professional. With advanced tooth technology and an ergonomic ProTouch™ grip, the PLUS range handsaws are number one for speed and ease and quality of cut. Along with these industry-leading features, the full range utilises a system of colour coded handles for easy selection.

- 1. UNIVERSAL TRIPLE GROUND TEETH**
Patented tooth grind designed to cut 25% faster
Versatile, universal teeth cut most building materials
- 2. STRONG BLADE**
High quality C75 steel is stable and ensures maximum power transfer with every stroke
- 3. PROTOUCH™ GRIP WITH FINGER REST**
With three times more elastomer for maximum soft-feel and control
- 4. OPTIMISED HAND CAPACITY**
Increased space for use with gloves and improved functionality
- 5. INCREASED GRIP CIRCUMFERENCE**
For a sturdy and robust feel
- 6. 90° & 45° ANGLES**
Integrated into handle for easy marking out

EVO HANDSAWS

The unique handle-to-blade relationship of the EVO handsaw overcomes traditional design limitations and maximises how the user interacts with the handsaw. With an innovative tooth design and superior ergonomics, the holistic product design optimises handle position (height and angle) against the tooth line. EVO covers virtually all user needs.

- HIGH ANGLED NOSE** increases blade stability
- HARD POINT TEETH (HP)** stay sharp 6-8 times longer than non-hardened teeth
- OPTIMISED TOOTH DESIGN & SET** provides maximum versatility, Speed of cut & quality of cut
- HIGH QUALITY C75 STEEL BLADE** ensures maximum stability and power transfer
- OPTIMISED PRODUCT DESIGN** for universal usage and highest versatility
- MAXIMUM BLADE USAGE** allows up to 100% blade usage
- FLUSH CUTTING** to cut off at surface level
- COMFORT GRIP** light and strong ultrasonic welded soft-grip handle for maximum grip and comfort
- 90° & 45°** for marking out
- FINGER-REST** for maximum control

PLANES & PLANE CUTTERS

IRWIN® Record® bring decades of experience, well proven design and advanced production techniques to produce this fine range of woodworking planes and cutters.

BENCH PLANES

Smoothing Plane used for smoothing and final finishing. Jack planes are used for the preliminary squaring of rough timber, and are the general workhorses for stock removal. Fore or jointer planes are used for removing the roughness and unevenness on long surfaces prior to smoothing.

- 1. HIGH-QUALITY**
Cast grey iron body with precision machined base
- 2. RAZOR SHARP**
Carbon steel cutting iron
- 3. ROBUST LEVER CAP**
Has three pressure points and brass locking nut for secure location of the cutting iron
- 4. FINE ADJUSTMENT**
Is controlled by a brass adjusting nut and lateral adjusting lever
