

**New Product – Key Facts**

**Product:**  
**GLM Hand Bending Machine**

**Application:**

suitable for bending 15 and 22mm pipe

To assist the bending of large diameter tube, it has pimped bungs on the bending levers which prevent the arm slipping if they are used on the floor. Steel inserts to the bungs eliminate piercing and increase durability

**Solid Lug**

Solid lug allows the pipe bender to be held firmly between vice jaws

The design of the GLM with a straight arm makes it the strangest machine available

**Formers**

Heavy duty formers will not loose their shape. Formers supported on both sides so they will not twist under heavy loading

**Flat edges**

to the braket arm also allow the GLM to be used in workshop vice for convenient bending

The 15mm&22mm formers have degree marks on the casting for "at a glance" accuracy

**Light and Portable**

Formers and guides are made from aluminium and the handles are tubular steel making the GLM light and portable

**Guides included**

**Steel Rollers**

Durable, hard wearing steel rollers – last much longer than aluminium.

**Maximum Capacity**

Copper 22 mm  
Stainless steel 15 mm  
It can also bend 12,15,18mm copper and is also available with imperial tooling
